CUSTOMER TESTIMONIALS

The units are amazing, your ability to size the units so close allows us to hone in to the best efficiency of the engine, "Your units are near an engine/governor."

Tim A.

Minneapolis, MN

We are impressed, a unit just came back after 8 years in service. "The units just run and run, the engine control simply turns it on when needed."

Vadim R.

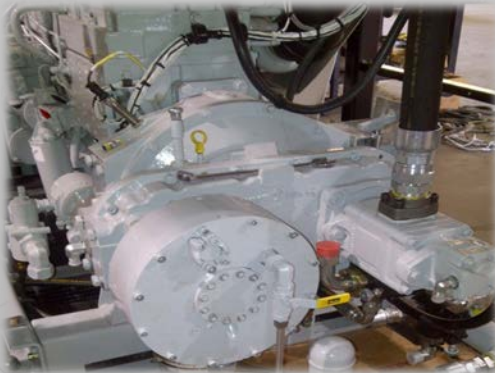

Moscow, Russia

When we spec equipment it needs to be rugged and reliable for offshore drilling. The Dynamic Heat Generator meets the demands that a lot of people just can't understand. Your DHG's are the best of the best. The "industry standard" for a reason-- "because they work".
